

Ball fountain

A narrow water jet allows balls of different sizes to "balance" on top of the jet.

The fountain is equipped with a 12v pump and a closed system that does not require drainage.

Size (W & H) ca: 1300mm x 700mm.

Material: Warm galvanised steel.

Surface treatment: Water resistant 2 component paint.

Power requirements: 12V.

Other: Changing the water is done by lifting the bowl.
