

## The Pelton turbine

*An experiment that shows the function of a Pelton turbine. The user pumps up water to the container, as it gets filled it starts to siphon. The water passes through the turbine and 18 LEDs light up in sequence and ends with a bright flashing from a light. This experiment can be added to with 2 containers and turbines to illustrate functions at different heights.*

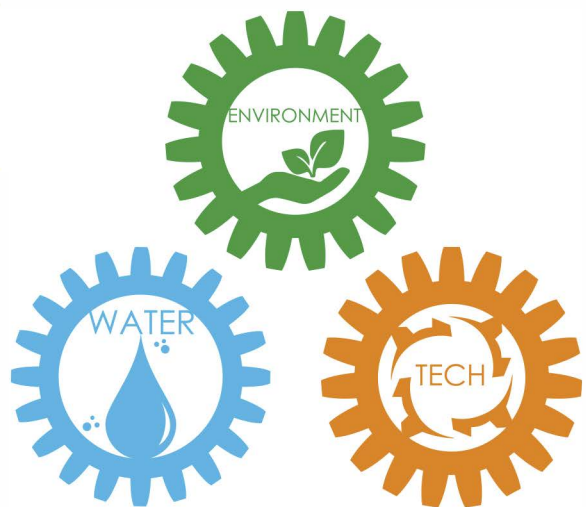

**Size (W & H) ca:** 900mm x 3000mm

**Material:** Stainless steel & plexi glass

**Surface treatment:** Sand blasted

**Power requirements:** 12V
